

# Tools to Assist with a Multi-Group, Multi-Divisional Project

Claude Saunders, AES/SSG

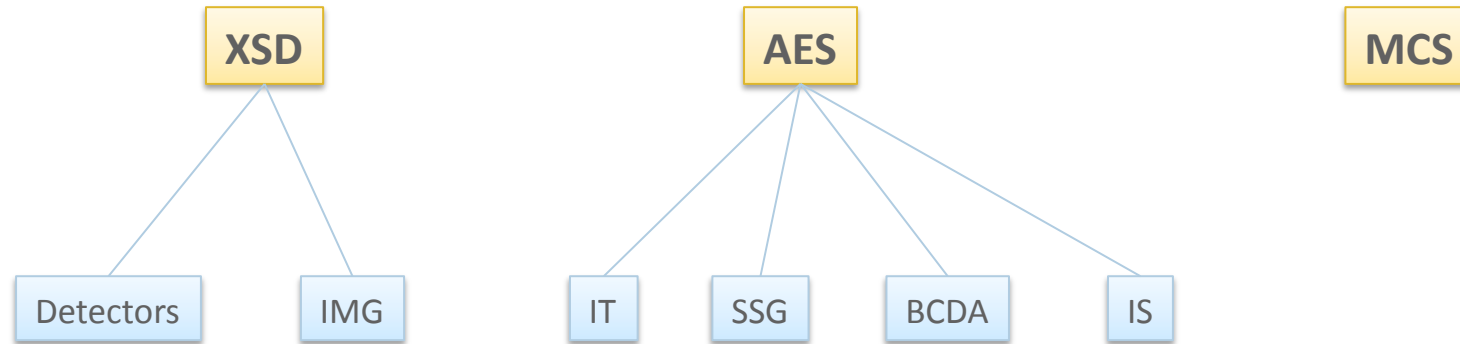

2011-04-06

APS Building 438, Room C0101

# Outline

- Brief Intro to Tools
- Brief Demo and tour of what is already set up for Tomo Upgrade Project
- Next Steps
- Questions?

# Tomo Upgrade Project

Lots to coordinate and keep track of. We need communication tools.

My philosophy: *keep it lightweight, but make disciplined use of it.*

# Project Tools

## ■ Wiki Pages

- Confluence

Project summary

Project status

Meeting minutes

Design/architecture

High level discussions

Comments

## ■ Issue Tracking

- Jira/GreenHopper

Requirements (stories)

Implementation (technical  
sub-tasks)

Planning/Priority (versions)

Progress (work log)

Bugs (bugs)

Comments

## ■ Source Code Control

- SVN/CVS

Project artifacts

<https://confluence.aps.anl.gov>

<https://jira.aps.anl.gov>

Note: both publicly visible outside ANL

# Next Steps

1. Hold presentations on existing progress in various areas
2. Document high level architecture in Confluence
3. Collect and refine detailed requirements in Jira
4. Plan out early milestones in Jira

# Demo of Confluence and Jira
